

HAIDLMAIR

INFORMATION

HAIDLMAIR: New North American branch

One of our company's principles is: "Forward is the direction!" In line with this motto, permanent further development is one of our most important premises. We are constantly searching for ways to improve ourselves. Because we already have several customers in America, the expansion to North America was quite obvious.

HAIDLMAIR now has its North American branch, HAIDLMAIR USA, incorporated in the US to demonstrate its commitment to the United States and Canadian market. One technician, Raymond Shadday stationed in Goodyear, Arizona is responsible for repair and service of HAIDLMAIR-moulds in operation domestically. This will decisively improve the quality of service for our North American customers.

Kurt Blechner, based in Lake Geneva, Wisconsin is responsible for sales and marketing of the HAIDLMAIR product line. The native American with German and Austrian roots has a well rounded technical education and years of experience in mouldmaking and the plastics industry. Our customers will benefit from his experience and having just one contact person in their time zone, who will be on-the-spot quickly addressing their needs in a professional manner.

Mr. Blechner is looking forward to your enquiries and getting to know you in person in the very near future.

HAIDLMAIR

INFORMATION

Kurt Blechner

His experience is working in the field of mouldmaking, tooling and machinery for the plastics processing industry for the past 30 years. He acted as president, plant, operations and general manager for reputable companies such as Coperion ,Ingersoll GmbH and Technoplast and brings with him an extensive knowledge in the sectors of injection moulding, extrusion and process automation.

HAIDLMAIR

INFORMATION

INFO HAILDMAIR group

HAILDMAIR GmbH, Mouldmaker

The Haidlmair GmbH, founded in 1979, is the parent company in a group of companies consisting currently of 7 companies with 500 employees, generating sales of around EUR 60 million. The core business of the parent plant in Nussbach/Upper Austria is the production of injection moulds with a focus on the full range of containers - from the crate to the pallet, supplemented by large moulds for pallets.

The companies Mould & Matic Solutions GmbH and EMO Extrusion Molding GmbH, both in Micheldorf and HTM Kft. / Szekesksfehervar, Hungary are focused on moulds for thermoforming and injection moulding for medical & packaging parts as well as automation solutions, extrusion dies for the production of films and sheets and the production of superstructures for pallets-, foldable- and crate moulds. Three other companies in the group are service providers for the mould maintenance and component manufacturing.
